FULL-TIME MS

90%
OF JOB-SEEKING GRADUATES RECEIVED EMPLOYMENT OFFERS within six months of graduation

Greetings,

Welcome to the Jay S. and Jeanne Benet Career Management Center at the University of Rochester's top-ranked Simon Business School. I am delighted to share with you the success of our most recent graduates.

The Simon MS Class of 2022 achieved success in many regards and surpassed their Class of 2021 predecessors in average US-based salary in all of our programs. As employers focused on recovering and rebuilding their workforce, the need for candidates with relevant knowledge and skills was high. Of the 941 corporate recruiters surveyed by the Graduate Management Admissions Council's (GMAC) annual Corporate Recruiter's Survey in 2022, several key takeaways provided us with an optimistic outlook for our MS students:

Candidates with a STEM focus are valuable to corporations. Hiring intentions for business master's candidates remains strong. At Simon, 90% of MS job-seeking graduates received employment offers within 6 months of graduation.

Business master's salaries are on the rise. Simon MS average salaries increased for all four programs.

US international hiring bounced back. As more US companies planned to hire international candidates, Simon graduates accepted positions within the US at record-setting compensation averages.

The success of our students is a testament to Simon's long history of producing MS graduates with strong analytical and leadership skills. Thank you for taking the time to review the enclosed information; I look forward to being a part of your transformative career journey.

Cordially,

LaTanya Johns (she/her/hers)
